

JOB DESCRIPTION

Post Holder:	Recruiting	Job title:	Front End Developer
Department:	Research and Development	Reports to:	Administration Manager

Overall purpose

To help maintain the company's reputation as a highly-regarded provider of web testing by developing high quality software that meets the requirements of Tribe products.

As a member of the Research and Development Department, the post-holder is expected to support the overall objectives of the Department and the Company by working with other staff members to meet clients' needs. This will involve working collaboratively with colleagues to aid the smooth running of projects and contributing to the Company's success.

Principal duties

- Work with the team to design, implement and test user-friendly front end components that help enrich the company's products.
- Use relevant languages, libraries, databases etc in our stack, especially Angular, JavaScript and Advanced HTML and CSS. <https://stackshare.io/thinktribe/thinktribe>
- Debug and fix any assigned tasks.
- Ensure security, performance optimisation and scalability of the application by conducting tests before and after code release.
- Collaborate with relevant colleagues, including front-end and back-end developers, Sys Admin, QA and other departments.
- Work closely with the Project Owner to clarify product requirements.
- Follow the current delivery process.
- Stay up-to-date on emerging technologies, development tools, programming techniques, and computing equipment; participating in educational opportunities; reading professional publications; maintaining personal networks; participating in professional organisations.
- Support learning of Graduate and Junior Front-End Developers (if any in post).
- Act as lead on projects as required.
- Protect operations by keeping information confidential.
- Contribute ideas and communicate regularly with colleagues about project work.
- Undertake any other duties commensurate with the level of the post as may reasonably be required.
